## Profile

Software engineer with three years of professional experience shipping production web applications end to end, from Vue and React front ends to Node.js APIs and SQL databases. Now pursuing an MSc in Computer Science (Software Systems) at VUB. Having studied and worked in China, the UAE and Belgium, I am at home in international teams and care about software that is fast, accessible and pleasant to use.

## Experience

### AKW Consultants — *Dubai, UAE*

Senior Software Engineer — *Oct. 2024 - Present*

- Lead development of Druid, a client dashboard and onboarding portal that streamlines client onboarding and compliance tracking.
- Build the Vue and TypeScript front end of Babylon, a client platform developed under NDA.
- Build full-stack features with Vue and AdonisJS, integrating Google Workspace and other third-party services.
- Drive system design, documentation and research spikes on new tools; review code, mentor junior developers and take part in hiring.

### Bayt.com — *Dubai, UAE*

Software Engineer II (promoted from Software Engineer I, Mar. 2024) — *Sept. 2023 - Sept. 2024*

- Designed an embeddable SDK widget that lets third-party platforms integrate Evalufy, expanding its reach by 25%.
- Led the migration of Evalufy, Bayt's online assessment platform, from Vue 2 to Vue 3 and Vite.
- Cut page load times by 15%, moved the app towards a PWA and shipped interview, exam and survey features.

### Neusoft — *Shenyang, China*

Full-Stack Developer Intern — *May 2022 - Jul. 2022*

- Built WebAcademy, an e-learning platform where teachers publish courses and students buy them and track their progress.
- Developed the React and TypeScript front end and contributed to the Spring Cloud Alibaba back end, MySQL schema and architecture.

## Education

### Vrije Universiteit Brussel (VUB) — *Brussels, Belgium*

MSc in Applied Sciences and Engineering: Computer Science, Software Systems — *Sept. 2026 - Present*

### Northeastern University — *Shenyang, China*

Bachelor of Engineering in Software Engineering

- GPA: 3.56. Thesis: *Design and Implementation of Image Generation System Based on Diffusion Model*.
- Relevant coursework: Data Structures, Algorithms, Artificial Intelligence, Machine Learning and Human-Computer Interaction.

## Selected Projects

### Recruitment Platform for Al Hazam International — *In development*

- Multi-tenant platform that runs an overseas recruitment agency's pipeline, from employer contracts and visa quotas to candidates' medicals, visas and departure; built so other agencies can onboard on their own subdomain. Vue 3, PrimeVue, AdonisJS, PostgreSQL.

### RealEnvision — *real-envision.vercel.app*

- Web studio built from my bachelor's thesis: text-to-image, inpainting and super-resolution. Next.js, FastAPI, PyTorch, MongoDB.

### WatchedThis — *watchedthis.malikdanial.xyz*

- TV show tracker with trending titles and upcoming release dates via TheMovieDB API. Next.js, TypeScript, MongoDB.

## Skills

| | |
|---|---|
| **Programming** | TypeScript, JavaScript, Java, Python, SQL, Bash |
| **Front end** | Vue (2 and 3), React, Next.js, React Native, Tailwind CSS, Vite, Webpack |
| **Back end** | Node.js, AdonisJS, Spring Boot, FastAPI, REST APIs |
| **Databases** | PostgreSQL, MySQL, MongoDB, Redis, Firebase |
| **Languages** | English (fluent), Urdu (native), Chinese, Dutch (learning) |
| **Interests** | Tennis |
